

We are proud to announce NIDEC's debut at the CES this coming January 2016

NIDEC will feature a wide-variety of its robotics related technologies such as next generation haptics, drive technology for drones and intelligent mobility, fine precision motion control, and our core competence - our broad motor portfolio embedded within these different types of applications. If you are planning to attend the CES, please make it a point to visit us. NIDEC welcomes all visitors to be part of this monumental event for our company.

Date: January 6-9, 2016

Location: Las Vegas Convention Center

Booth: Sands Hall, 72257 A-C

NIDEC is also hosting a corporate hospitality suite for our strategic partners and customers. Please contact us to reserve a time for a more formal introduction to the key people from any of our technologies or member group companies.
